Forecast for Wednesday 08 Jun 2022

Weather: Outbreaks of heavy, showery rain at first will become light and patchy during the early hours before clearing soon after dawn. Cloud will lift and break during the morning to allow some bright or sunny spells, but at the same time scattered heavy showers will break out, these with a low risk of thunder and hail. The risk of thunderstorms passes mid-afternoon onwards, but showers will continue into the evening, possibly giving some more persistent spells of rain at times.

Chance of cloud-free hill tops above 800m: 40% at first otherwise 80%.

Low Cloud and visibility: Periods of cloud down to 400-500m in the early hours and at first Wednesday morning, particularly affecting western slopes. Otherwise occasionally broken cloud near 1000m, with patches lowering to 700m in showers. Visibility generally good beneath cloud, but moderate in rain and lighter showers, and briefly poor in heavy showers or hail.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

UV levels will be high in any sunny spells and adequate sun protection is highly advised. Brisk winds will make it feel unseasonably cold on the summits, so remember to pack warm layers as well as waterproofs.

Forecast for Thursday 09 Jun 2022

Weather: Outbreaks of light rain in the early hours will clear before dawn, with some dry and bright spells at first Thursday morning. Outbreaks of rain will spread in from the southwest around midday to give a wet afternoon. The rain will ease towards evening, and will eventually clear mid-evening onwards with some clear spells developing.

Maximum wind: Southwest 30mph gust 40mph.

Chance of cloud-free hill tops above 800m: 80% becoming 40% during the early hours. Improving to 90% for a time mid-morning, but deteriorating to 20% as rain arrives. Improving to 80% late evening.

Low Cloud and visibility: Patchy cloud near 700m at first will lower in the early hours to give periods of cloud on slopes above 500-600m. This low cloud will lift and break by mid-morning to leave only patches near 900m, however extensive cloud will develop in afternoon rain around 400-500m. An improvement mid-evening onwards as cloud lifts to leave only patches near 800m. Visibility beneath cloud moderate or poor in rain, but good for a time mid-morning as cloud lifts, and becoming very good late evening.

Temperature: **Valleys:** Plus 10 Celsius becoming plus 16 Celsius.
At 800m: Plus 8 Celsius.
Freezing level: Above the summits.
